- Experience on CI/CD tools for automated build deployment with Jenkins and GitHub as a code repository for version control.
- Experience with working on Test Automation tools- Selenium WebDriver using TestNG and BDD-Cucumber framework and Web Services (API Testing) using Postman, Rest-Assured.
- Experience in Stakeholder communication, Delivery of Status Reports and Test Metrics and involved in preparation of QA Deliverables

Skills

- **Web Automation:** Selenium WebDriver, Cypress
- **Testing Framework:** TestNG, Cucumber
- **Web Services (API Testing Tools):** Rest Assured, Postman, SOAPUI
- **Languages:** Java , JavaScript
- **Databases:** MySQL, Oracle, PostgreSQL
- **Tools:** Jenkins, DataDog, Acunetix , ZAP, IntelliJ, Gradle, Maven, NexusIQ
- **Operating System:** Linux, Windows
- **CI/CD and Version control tools:** Jenkins, GitHub
- **Test Management tools:** HPQC, Zephyr, QTest
- **Project Management tool:** JIRA

Professional Experience

Capgemini -Canada | QA Lead | Nov 2023 -Present

Client: Discover Financials Services -US

- Used Serenity Rest Assured for developing automated test scripts for the Interest Calculator API.
- Automated scripts for Batch testing using Serenity Cucumber framework.
- Created performance testing scripts with Gatling and integrated monitoring through DataDog, enhancing

system performance insights.

- Worked on QA Process improvements like example mapping for scenarios coverage and team collaboration with OOPSI practice.
- Prepared and executed Change Implementation Plans for BAU applications during Golden Image upgrades, successfully deploying in Pre-Prod and Production environments.
- Monitored Pod logs in OpenShift (OCP) and manage Trident pipeline deployments, ensuring smooth application rollout and stability.
- Developed and executed API test scripts using WireMock for service virtualization.

Client: RBC -Canada | Nov 2023 – Feb 2025

- Involved in Client onboarding from HSBC to RBC as part of conversion and migration testing.
- Responsible for performing Functional testing in QA & UAT environments for both Payables and Pooled Receivables product.
- Contributed in creating Master Test Plan (MTP) and Test sign off reports for all major releases.
- Involved in POC -Automation for Regression test suite using Selenium -BDD framework.
- Involved in test estimates and resource planning for task assignments. Onboarded Offshore team and coordinating/assigning on daily basis.
- Developed and maintained detailed artifacts in Jira (Confluence) such as test plans , evidence documents.
- Lead the AML end to end (E2E) testing in UAT environment/PIV.
- Involved in creating Process and Quality metrics reports i.e. Test execution & Defect metrics
- Involved on test data setup for the conversion team part data migration team.

OneAdvanced -India | Test Team Lead | Apr 2017 – Sep 2023

Client: NHS UK

- Created a detailed test plan that covered all aspects of the project and also documented the test strategy and procedures in Confluence for easy reference.
- Automated API testing by utilizing Postman and Rest API.
- Actively involved in all Scrum Ceremonies – Daily Scrum meeting, Sprint grooming/planning, Sprint review/demo and Sprint retrospective.
- Contributed in automating regression test cases for eProcurement (eFin supporting product) using Cypress binding with Javascript.

TCS -India | Business Process Lead | May 2015 - Sep 2016

Client: CITI Bank

- Involved in Business Scenario Preparation and designed test cases to cover all aspects of trade finance, including letter of credit processing, documentary collections, and trade-related compliance.
- Involved in building BDD Framework with Cucumber using Page Object Model pattern with Java binding, using Selenium WebDriver
- Created test data required to execute the scenarios for User Acceptance testing (UAT).
- Responsible for performing Smoke, Sanity, Regression and UAT testing.
- Submitting WSR report to product management.

iGATE | Senior Engineer V&V | Sept 2011 - Mar 2015

Client : RBC

- Functional and Regression testing of the application.
- Requirement Analysis and Test Data creation.
- Validation of Trade Finance transaction i.e., Testing end to end workflow for an Order placed from Front office and executing the same order using Broadridge system (BPS)
- Validating data in the reports with that of the backend using SQL queries.
- Implementation of Business Process Testing involving design and execution of components and test cases.
- Performed smoke testing, ad-hoc testing, regression testing providing end to end coverage for the application.
- Client reporting and Management of Audit documents.

Education

Velagapudi Ramakrishna Siddhartha Engineering College

Bachelor of Technology, Electronics & Instrumentation

Licenses & Certificates

Scrum Master Certified (SMC) - International Scrum Institute™ (Scrum Institute)

ISTQB® Foundation Level

Certified Professional Selenium Automation Testing – Agile Testing Alliance

Introduction to Generative AI – AWS

BDD Cucumber with Java-Master class Selenium Framework – Udemy
